- 0.25 oz (0.01 kg) Resolution.
- Non-slip Cushioned Design.
- Full Numeric Keypad for Fast Operation.
- Strong Magnetic Back on Handle.

model SRS1

Residential and Light Commercial Refrigerant Scale - SRS1

The new SRS1 refrigerant scale is big enough to comfortably fit a canister, but compact and light weight enough to carry easily.

Heavy Duty

It has the ruggedness needed for HVACR, with thick aluminum walls to maintain accuracy, and rubber feet and rubber pad to soften the impact of daily use.

Charging and Recovery Alarms

You can quickly set a charge or recovery alarm using the big numeric keypad without scrolling digits. Once you dial in how much refrigerant to charge or recover you can keep working, knowing the alarm will sound when it's close to the time to close the valve.

Easy to Carry

Weighing less than seven pounds, and housed in a heavy duty soft-sided case, the SRS1 is easy to throw over your shoulder when you need to carry other things or climb a ladder.
